	3.4 THE HA CONFIGURATION DROP DOWN MENU	
	3.5 THE REPORTS DROP DOWN MENU	. Ę
	3.6 THE TOOLS DROP DOWN MENU	. 5
	3.7 THE HELP DROP DOWN MENU	. 6

#### 1. INTRODUCTION

This chapter explains the various layouts within FRS 2.1. It delivers information on desktop icons needed to enter household data and describes what each of the drop down menus contain.

#### 2. FRS 2.1 MAIN DESKTOP CATEGORIES

The main desktop window appears when you open the FRS 2.1 application and displays four icons:

**New Household**: Use the **New Household** section to capture information about a new participant who does not currently have a record in the FRS 2.1 database. Click on this button to open the New Head of Household window.

Maintain Household: Use the Maintain Household section to edit information about an existing participant with a record already stored in the database. Click on this button to open the Head of Household Browser window.

Transmit File to MTCS: Use the Transmit File to MTCS section to submit accurate and complete applications to MTCS. Click on this button to open the Submit Forms window.

Retrieve Error File from MTCS: Use the Retrieve Errors section to retrieve error reports from MTCS. Click on this button to initiate a SprintMail session or to open the Internet Browser.

#### 3. FRS 2.1 MAIN MENU BAR

The FRS 2.1 Main Menu Bar contains the following headings:

Each of the headings displayed above are discussed in detail in the sections that follow.

#### 3.1 THE FILE DROP DOWN MENU

The  $\underline{F}$ ile drop down menu contains four options:

The <u>New Household</u> option performs the same function as the New Household button on the main FRS 2.1 desktop window. When you select <u>New Household from the File drop down menu</u>, FRS 2.1 presents a New Head of Household Information window.

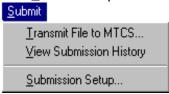

The <u>Maintain Household</u> option performs the same function as the Maintain Household button on the main FRS 2.1 desktop window. When you select <u>Maintain Household from the File drop down menu</u>, FRS 2.1 presents the Head of Household Browser window.

The **View <u>Recycle Bin</u>** option displays the household records of families whose records were sent to the Recycle Bin. From the recycle bin, you may delete the records or return the household records to the browser.

The **Exit FRS** option closes FRS 2.1.

# 3.2 THE SUBMIT DROP DOWN MENU

The Submit drop down menu contains three options:

The <u>Transmit File to MTCS</u> option opens the Forms Submission Status window. This window lists the Form HUD-50058s that passed all FRS 2.1 edits and are ready for submission to MTCS. The window also lists Form HUD-50058s that do not pass the FRS 2.1 edits in a separate area.

The <u>View Submission History</u> option opens the Submission History screen, which displays the date and time of submissions to MTCS, and includes the number of Form HUD-50058s.

The <u>Submission Setup</u> option allows you to select the method of data transmission (i.e Internet or SprintMail) to submit data to MTCS. Use this option if you did not perform the submission setup during installation or if you would like to change the method of data transmission you selected during installation.

#### 3.3 THE RECEIVE DROP DOWN MENU

The Receive drop down menu contains two options:

<u>Retrieve Error File from MTCS</u>
<u>View Error File Retrieved from MTCS</u>

The <u>Retrieve Error File from MTCS</u> option allows the user to access error notifications from either SprintMail or the Internet. For users who transmit via Sprintmail, this option initiates a SprintMail session to retrieve errors from the SprintMail host. For users who transmit via the Internet, this option launches the users designated Internet browser.

The <u>View Error File Retrieved from MTCS</u> option is only available to SprintMail users. This option opens a box in which you may choose to view previous or new error files. If you select to view new error files, FRS 2.1 replaces previously retrieved error files.

# 3.4 THE HA CONFIGURATION DROP DOWN MENU

The <u>HA</u> Configuration drop down menu allows you to access fields you completed during installation and make changes. The menu contains five options:

#### HA Configuration

HA Identification

HA Jurisdictions

HA Projects/Sites

HA Default Values

Originating HAs

The **HA** <u>I</u>dentification option opens the Housing Agency Identification window. This window contains the installation information previously entered. If this information is not provided, use this option to identify the following:

- Agency Name
- HA Number
- Subcontractor Name
- Subcontractor Mailbox ID

The **HA** <u>Jurisdictions</u> option opens the Housing Agency Jurisdictions window. This window contains the installation information previously entered. If this information is not provided, use this option to:

- **Select HA Home Jurisdiction.** This is the state in which your PHA has home jurisdiction.
- Select other applicable project jurisdictions (one at a time) from the List of all potential project
  jurisdictions list box and click the Add State button. The selected jurisdiction is added to the
  Project jurisdictions that PHA has unit authority field. To remove a state from the Project
  jurisdictions that PHA has unit authority field, select the state from this field and click the
  Remove State button.

The **HA** <u>Projects/Sites</u> option opens the HA Projects/Sites window. Use this window to maintain information about Public Housing projects and sites for which the PHA administers rental housing programs. Enter the three digit project number and the project name. If the project has multiple sites, enter the three digit site number and the site name.

The **HA** <u>Default Values</u> option opens the HA Default Values window. This window contains the installation information provided during FRS 2.1 installation.

**NOTE:** Default values are very important to FRS 2.1 data collection. These values are often pre-determined percentages or dollar amounts used to calculate income information. Any changes to these values affects income calculations and, therefore, rent calculations.

To ensure that FRS 2.1 applies the correct default values to a household record, whenever any default value changes, you must enter a **new** Effective Date of Default Values. This date ensures that FRS 2.1 only applies the new default values to those households with an effective date of action after this date.

If you did not provide information during installation, use this option to enter:

# **Required Default Values**

- Effective Date of Default Values
- Passbook Rate

# **Indian Mutual Default Values Only**

- The Mutual Help and Occupancy Agreement Percentage
- Administration Charge Set By Each Indian Housing Authority

#### Leave these defaults unchanged unless instructed by HUD

- Medical Threshold Percentage
- Elderly/Disability Allowance

- Allowance per Dependent
- Percentage Used to Derive the TTP if Based on Annual Income
- Percentage Used to Derive the TTP if Based on the Adjusted Annual Income
- For information on HA Configuration steps, please see Chapter 2-B, Complete the Housing Agency Configuration, at: www.hud.gov/pih/systems/mtcs/document.html#frs

#### 3.5 THE REPORTS DROP DOWN MENU

The Reports drop down menu contains four options:

#### <u>Reports</u>

Reexamination by Action Date Reexamination by HOH SSN Household Members by Program Unpassed Forms by HOH Name

The **Reexamination by Action Date** option lists families due for reexamination. It lists the Effective Date of Action, the Head of Household Name and Social Security Number (SSN), sorted by the Effective Date of Action.

The **Reexamination by HOH SSN** option lists families due for reexamination. It lists the Effective Date of Action, the Head of Household Name and SSN, sorted by the Head of Household's Social Security Number.

The **Household Members by Program** option lists each household broken down by rental subsidy program.

The **Unpassed forms by HOH Name** option lists all forms that have not passed FRS edits due to errors. The list provides the Head of Household Name and Social Security Number.

#### 3.6 THE TOOLS DROP DOWN MENU

The <u>T</u>ools drop down menu contains one option:

The **Convert Old FRS Data** option allows you to convert data from older versions of FRS (1.0 and 1.1). If you converted your data during installation, you cannot access this option. Refer to the steps listed earlier in this document for step-by-step instructions for data conversion.

For more information on converting old FRS data, please see the 'Convert Data in FRS' chapter at: www.hud.gov/pih/systems/mtcs/document.html#frs

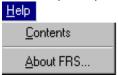

**WARNING:** You can only access this option, **before** you enter family data into FRS 2.1.

Multiple HAs are those users that transmit for more than one HA. The **Administer Multiple HAs option** allows you to maintain multiple HA databases as well as change a working HA database.

For more information on Multiple HA reporting, please see the 'Multiple HA User Guide' chapter at: www.hud.gov/pih/systems/mtcs/document.html#frs

# 3.7 THE HELP DROP DOWN MENU

The <u>H</u>elp drop down menu contains two options:

The **Contents** option displays the main window of FRS 2.1 Help.

The Help system provides on-line assistance and contains much of the information included in this Guide.

The **About FRS** option displays information about the FRS 2.1 design and the FRS 2.1 version ID.
